

DriveAI - ADAS Validation Software

From \$5,000 / month

Cloud software for ADAS development teams to upload vehicle data, replay drives with synced video and CAN, review model predictions, and validate performance across weather and driving conditions.

- Auto-upload from your fleet
- Weather condition augmentation
- Replay all drives for validation & verification
- Automated test case generation
- Synced video, CAN, and model overlays
- Integrates with your ADAS stack

Development Hardware

- Nvidia Orin AI Chip
- Drive-by-wire software
- 2x CAN-FD, Ubuntu 22.04
- Openpilot AI Model + Controls
- 8 GMSL2 Cameras + Radar/Lidar

On-site Training & Support

- Resident Engineers as needed
- Sync Data from your ECU
- Data Replay with your ADAS Software
- Scalable data storage
- Development Partner for Fleet Learning
