

Introducing..

Deepview AI Camera for Manufacturing

\$12,500 Period.

No Annual Licensing Fees
No Extra Computers to build Neural Network
Lights, Lens, Cables Extra

- Only AI Smart Camera with On-Board Capability of Network Train, Store & Deploy
- 384 GPU's Computing Power
- 12 Trillion Operations a Second
- Optional 2TB storage can save 2 Million Images On-Camera
- Web-browser User Interface
- EtherNet/IP, 24V logic
- Made in Michigan
- In Stock

Let's get
Started.

Pilot Program \$5,000

We will come to your plant and install and test Deepview AI for two weeks with the correct lens and lighting

We will train your staff how to teach the Neural Network. After a few days and more images, if it's not working to your satisfaction, we will pull the system out.

If you decide to keep it, we will credit 50% of the cost of the pilot to your order.

Training Unit \$1,500 Discount

Special Discount to purchase one unit

- *Testing Applications in your lab*
- *Training your staff how it works*
- *Spare unit as a backup*
